

**expect fun / class**

```
graph TD; A[expect fun / class] --> B[actual fun / class declaration]; A --> C[actual fun / class declaration]; B --- D[import iOS libraries]; C --- E[import JVM libraries];
```

The diagram illustrates a branching structure. At the top, a grey box labeled 'expect fun / class' has two curved arrows pointing down to two separate columns. The left column consists of an orange box labeled 'actual fun / class declaration' and a bottom orange box labeled 'import iOS libraries'. The right column consists of a green box labeled 'actual fun / class declaration' and a bottom green box labeled 'import JVM libraries'.

**actual fun / class declaration**

**import iOS libraries**

**actual fun / class declaration**

**import JVM libraries**
